

The SafeWork Sensor

The next generation of Strongarm's sensor hardware

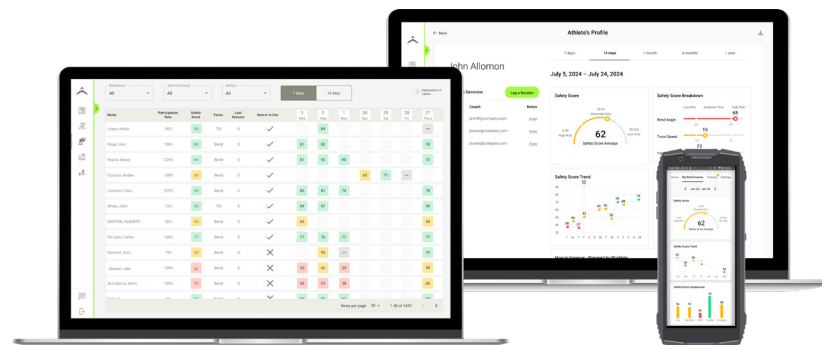

Empower individuals with their own safety performance, inform leaders where risks lie, and intervene to prevent injury before it happens—all with one device.

Unmatched User Experience

- **Familiar Interaction**
Simple, intuitive, and easy. No learning curve. Just peace of mind.
- **Accessible**
Supports multiple languages because safety speaks all languages.
- **Cross-Shift & Cross-User Flexibility**
Service multiple users across multiple shifts with the same device.

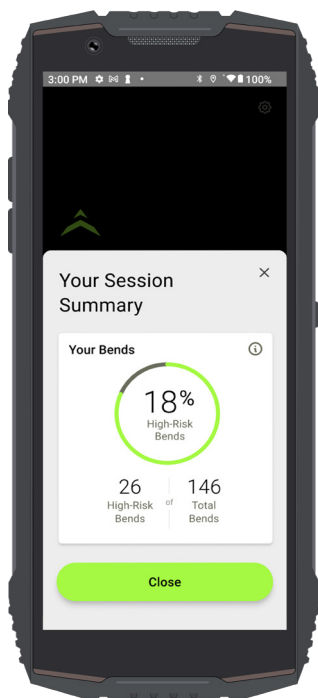

Secure and Robust Platform

- **Highly Configurable and Corporate Managed**
Configure devices specific to your team's desired access.
- **Real-Time Feedback**
Vibration, auditory, or visual alerts in real-time let users know when their movements put them at risk.
- **Built Tough**
Rugged, water-resistant, and dustproof to go where your team goes, no matter the conditions.

HARDWARE FEATURES

Overall Dimensions	Screen Size	Compute	Connectivity	Battery Life
5.3 oz (149g) 58.1mm x 131mm x 13.4 mm	4.5" 1080x450 resolution	6GB RAM 128GB ROM	WiFi + BLE enabled Dual Sim capable, 4G	36+ hours of continuous use 3000mAh

SESSION SUMMARY

- Available after every session**
 Team members will receive the total number and percentage of high-risk forward bends they performed during their work shift.
- Forward bend focused**
 Deep, repetitive forward bending is a leading cause of back strain, resulting in significant medical expenses and long-term health issues for workers. By highlighting this connection, Session Summary encourages safer practices and helps prevent costly injuries.
- Participation booster**
 Team members are more likely to participate actively in the program when they see the direct impact of their actions on their safety and well-being.
