Device ID
(StrongArm decal with barcode)

Charging Pin

Primary Functions

1. Checkout Devices
Each Industrial Athlete selects their Name/Employee ID from a preloaded list displayed on the device touch screen.
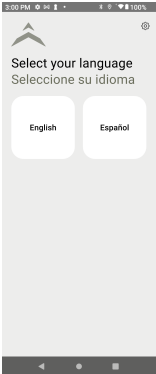

2. Uploading Data
Network connection is required to upload sensor data. Easily connect via Wi-Fi or a StrongArm provided hotspot.
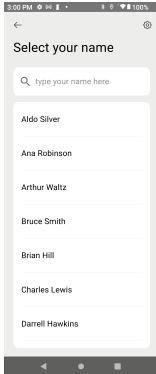

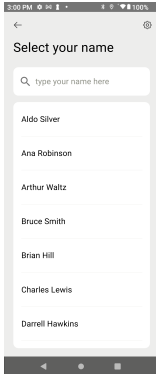

3. Device Charging
The supplied charging dock should be plugged into the power source at all times. Plug in the device with the supplied charging cable. A green LED light signals active charging status.

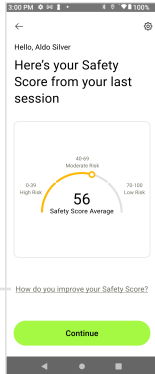

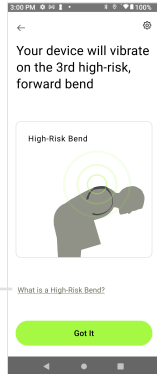

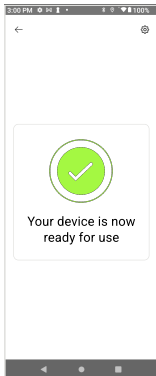

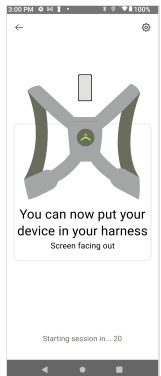

Device Check-Out

1

Select your language
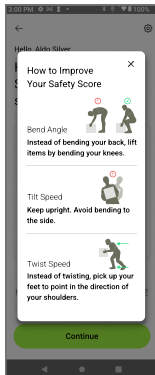

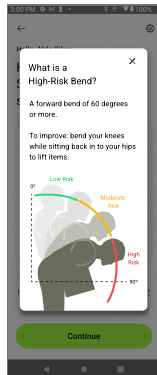

2

Select your name or employee ID from the list

Press confirm to verify the selection

3 (optional)

Review the daily Safety Score metrics screen and the Haptic Alert informational screen

4

The device is ready to use and can be placed in the harness as instructed by program administrator

The display then shows an active session along with other information

Additional information about how to improve your Safety Score and what is considered a High-Risk Bend Angle

Device Check-In

When you are ready to check the device in, swipe the "Swipe to End Session" button on the screen to complete your session.

Connect the device to the charging cable so it's ready for the next user
